

COMMERCIAL ELECTRIC VEHICLE CHARGING INCENTIVES

SMART, RELIABLE CHARGING STARTS WITH A PLAN

Plan Before You Purchase

Installing EV charging equipment is easiest and most cost-effective when planned early. Contacting your Energy Services Manager before purchasing equipment helps ensure the right charger is selected, electrical capacity is sufficient, and installation proceeds smoothly.

We offer guidance and financial incentives to support safe, reliable EV charging installations in our community.

Who Is Eligible

- Commercial customers installing Level 2 or Level 3 charging equipment
- Businesses or organizations installing EV charging as part of new construction

Available Incentives

Incentives are limited to 50% of installed cost.

- Commercial Level 2 or Level 3 charger – \$1,000
- Commercial dual head charger – \$1,500
- New construction commercial dual head EV charger – \$2,000

Before You Buy

A short conversation first can help avoid delays and ensure your project qualifies.

Program Requirements

- An application is required
- Proof of purchase and installation documentation are required
- Incentives are subject to program guidelines and available funding

Get Started

Contact your Energy Services Manager to discuss your project and request an application.
